

Tour Pack Rack

- Fits all HD King and some other tour packs -

PT # HD040

Installation Instructions

1. Place masking or duct tape on the lid of the trunk in the general area that the legs or feet contact the lid when the rack is centered on the lid (the upturned edge of the rack goes to the towards the back rest pad).
2. Carefully center and align the rack on the trunk lid to be evenly spaced with the raised lines or creases of the trunk lid, and about 1/2" from the backrest pad. Using a pencil or pen, trace around the four legs onto the tape.
3. Drill 9/32" holes at the center of your marks. Remove the tape. Locate the four 6mm bolts, washers and rubber washers supplied. Place the lock washers, then washers onto the bolts, the bolts through the trunk lid, and then put a rubber washer onto each bolt - followed by the plastic stepped washers with the step facing the rack legs.
4. Start all four bolts into the legs on the rack. Tighten the four bolts **ONLY ENOUGH** to slightly compress the rubber washer - over tightening will crack the lid in time. **NOTE** that the weight limit for the lid is 7lbs.
